

# Innovative Learning Pathways for Sustainable Development

## The 3rd Transnational Project Meeting of GREEN4ADU in Palermo

On 16 September, the GREEN4ADU partners gathered in Palermo for the 3rd Transnational Project Meeting hosted by CEIPES. The session was dedicated to reviewing the project's progress, including the platform and video content, while sharing insights from the testing phase with adults. Partners also worked together on the next steps, from planning the upcoming workshops and the webinar to shaping the GREEN4ADU Toolkit. During the meeting partners also discussed about dissemination, sustainability, and project management activities. The day concluded with fruitful discussions that further strengthened our team's cooperation.

## The Learning, Teaching and Training Activity (LTTA) of GREEN4ADU

On 17–18 September, the GREEN4ADU project continued in Palermo with the Learning, Teaching and Training Activities. These sessions added a hands-on and creative dimension to the meeting, including a natural soap-making workshop, a visit to Radici Museo della Natura, and engaging discussions on wellbeing, outdoor education, and non-formal learning. Participants also collaborated to co-design the project's upcoming workshops, laying the groundwork for future activities.

## Green4ADU Webinar: Learn Green Skills & Reconnect with Nature

On 15 October 2025 (14:00–15:30 CET), GREEN4ADU will host a free online webinar on green skills and nature-based learning. Participants will hear from experts, explore job opportunities in the green sector, discover training materials, and gain access to the project's e-learning platform. Open to all interested in sustainability, this event is a chance to connect and grow together.

## Meet the Speakers:

### Mrs. Athanasia Ioannidou

- Director of SEGE & member of WEnCoop
- Over 10 years of experience empowering women in entrepreneurship and social inclusion
- Part of WEnCoop – Europe's first Women Energy Cooperative
- EEPA Award Winner 2022, leading projects in sustainable energy and community empowerment

### Dr. Szymon Krupinski

- Co-founder & COO of WasteAnt, leading hardware & system integration
- Specialist in AI and sensors for waste plants since 2019
- Former robotics researcher and university lecturer in Computer Science/Robotics
- Holds a PhD in Automation (University of Nice)

**OPEN CALL**

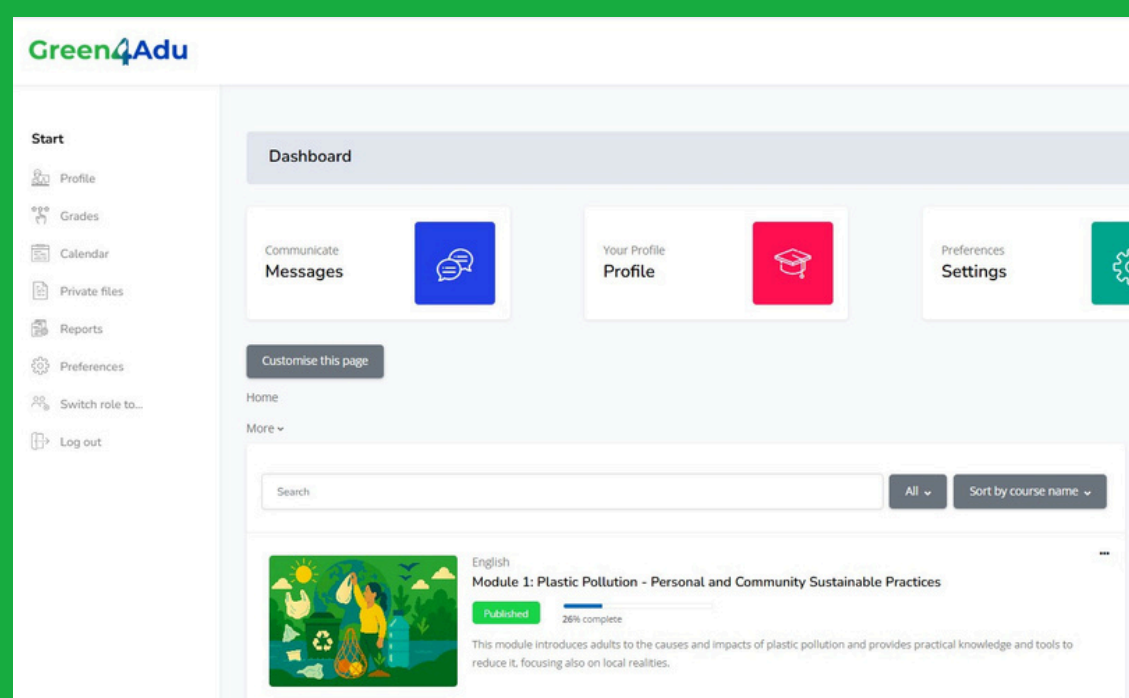

Learn Green Skills & Reconnect with Nature

15 October 2025 | 14:00–15:30  
(CET, Central European Time)

Online (free participation)

What you will achieve:

- Discussion with experts in the field
- Job opportunities in the green sector
- Educational material on green skills
- Access to an e-learning platform

## The Green4Adu Moodle Platform will officially launch on October 9th!

This innovative platform will offer tools, resources, and learning opportunities dedicated to promoting sustainability and green practices in adult education.

Stay tuned for updates and be among the first to explore this exciting new space for learning and collaboration!

# Innovative Learning Pathways for Sustainable Development

## The next steps of the project

The GREEN4ADU project is rolling out a series of learning workshops focused on psycho-physical wellbeing and awareness-raising. Taking place in Apeldoorn, Palermo, Thessaloniki, Salamanca, and Bremen, each workshop combines theoretical content with outdoor activities, encouraging reflection and action on climate and environmental challenges. With 4 sessions involving at least 15 participants (adult learners, educators, and activists,) the workshops promote “learning by doing,” empowering participants to develop transversal skills while co-leading activities. The next step will be the development of the GREEN4ADU Toolkit, gathering methodologies, practices, and results to inspire replication across Europe.
