Discover the SiT Platform: Learn, Connect and Share Best Practices for a More Sustainable TCLF Sector

The transition towards a more sustainable textile, clothing, leather and footwear (TCLF) sector requires knowledge, collaboration and the ability to learn from real-world experiences.

The SiT Platform has been created as a digital space where professionals, businesses, educators and other stakeholders in the TCLF sector can connect, exchange knowledge and access resources to support the green transformation of the industry.

Through the platform, users can join communities, expand their professional network, discover events and opportunities, access learning resources and connect with others, working towards a more sustainable future for the sector. To support the development of new skills and competences, the SiT Platform also provides access to specialized e-learning opportunities focused on sustainable textiles and textile recycling through two dedicated courses: the Bio-Textile Technician Course (EQF Level 5) and the Textile Recycling Manager Course (EQF Level 6).

Funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or the European Education and Culture Executive Agency (EACEA). Neither the European Union nor EACEA can be held responsible for them.

Explore the Best Practices section

One of the key features of the platform is the Best Practices section — a dedicated space showcasing innovative approaches, practical solutions and successful experiences from across the TCLF ecosystem in various countries.

It provides inspiration for organisations and professionals looking to address sustainability challenges and explore new ways of working. By sharing examples of initiatives that have already been implemented, the Best Practices section helps make knowledge more accessible and encourages the transfer of ideas, solutions and approaches across the sector.

From circular economy and sustainable production to innovation, skills development and new approaches to the green transition, the section offers a growing collection of examples that demonstrate how sustainability can be put into practice.

Why explore Best Practices?

- ✓ Discover real-world solutions and initiatives addressing sustainability challenges.
- ✓ Learn from successful experiences developed by organisations and professionals in the TCLF sector.
- ✓ Find inspiration for new projects, activities and approaches.
- ✓ Share knowledge and contribute to a stronger and more connected sustainable TCLF community.

The SiT Platform is more than a place to find information. It is a space to learn, connect and share — helping turn individual experiences and innovative solutions into knowledge that can inspire the wider sector.
