

Information Security & Data Protection Policy

Purpose & Commitment

OECON GROUP recognizes the importance of protecting information, personal data, and information systems managed within the scope of its activities. Management is committed to maintaining high security standards to safeguard the interests of its clients, partners, and personnel.

Compliance Framework & Standards

The company implements an Information Security Management System (ISMS) in accordance with the international standard **ISO/IEC 27001:2022**, ensuring:

- Full compliance with applicable national and European legislation, including the **General Data Protection Regulation (GDPR)**
- Continuous assessment and improvement of security measures and technological infrastructure **Core Information Protection Principles**

Our policy is based on the following principles:

- **Confidentiality, Integrity and Availability:** Ensuring that information is protected against unauthorized access, remains accurate, and is available to authorized users whenever required.
- **Principle of Least Privilege:** Access to data and systems is granted strictly on the basis of demonstrated business need.
- **Infrastructure & Third-Party Security:** Implementation of advanced security measures (encryption, Multi-Factor Authentication - MFA, secure backups) and strict Non-Disclosure Agreements (NDAs) with all external partners and suppliers.
- **Personnel Awareness:** Continuous training and awareness of our workforce on information security matters and best practices.
